

# THE LITERATURE AS AN OTHER REALITY

What do you think about  
creating your own reality?

Since the human mind has  
existed the imagination has  
been a part of our essence.  
we have always tried to  
create a parallel story of  
things that we would want  
they could be true so that all  
our fantasies can be realized  
in a reality.

Who can imagine a story? All the people can express  
feelings within literature. I think literature will  
make a new beginning in the art of expressing our  
ideas and is more efficient than talking them because  
of plan you need to develop to be able to write.

As a conclusion we can write an interesting set of  
ideas by making a relation between the reality and  
the fantasy.

Exist a form of wisdom  
which permits that a  
fantasy can be a  
reality. The literature  
is the art of creating a  
written reality. There  
are people who think  
when they read a  
master piece of  
literature it can  
transport themselves  
to another point of  
view and make them  
understand a new  
ideology.

My essay is  
polish it well  
Good effort.
